

# CATHOLIC UNIVERSITY OF ZIMBABWE LIBRARY

## Guide to the Library of Congress Classification System (LC)

## What is a call number?

The Catholic University of Zimbabwe Library uses the Library of Congress Classification system when assigning call numbers to books and other items. A call number is an address which determines the item's location on the shelf.

## Where are call numbers located?

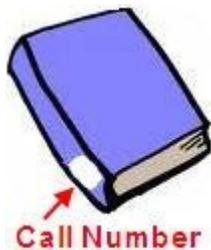

When using Mandarin OPAC, the Library's online catalog, a call number usually accompanies the record of an item. In the catalog, the call number appears on one line. For example, the call number for the book titled **Human Development**, found in Mandarin OPAC would look like this:

The screenshot shows the M3 OPAC interface for the Catholic University of Zimbabwe Library. The main content area displays search results for 'Human Development'. The results are organized into a table with columns for Location, Call Number, Barcode, Status, and Due Date. Two records are shown, both on the OPEN SHELF with call numbers BF 713 .P35. The interface also includes navigation tabs (Search, Results, Bookbag, Databases, My Account) and action buttons (Record Format, Add To Bookbag, Print).

Location	Call Number	Barcode	Status	Due Date
OPEN SHELF	BF 713 .P35	BK0001227	Available	
OPEN SHELF	BF 713 .P35	BK0001251	Available	

The same corresponding call number found in Mandarin OPAC will be found on the spine of a book or item, letting you know its location on the shelf.

Use M3 OPAC to

Records

## The Anatomy of a Call Number

The Library of Congress Classification uses a combination of letters and numbers to generate call numbers for books and other items. Each item you find in Mandarin

OPAC or on a shelf in the Library, will have a Library of Congress call number consisting of both letters and numbers.

<b>BF</b>	}	The first two lines describe the subject of the book: Psychology: Human Development	Book Title: Human Development
<b>713</b>			
<b>.P35</b>	↙	The third line represents the author's last name: Diane E. Papalia	Author: Diane E. Papalia
			Call Number: BF713.P35

### Finding items on the shelf using call numbers

Since most Library of Congress call numbers consist of several letters and numbers, it is important to write down the entire call number when looking for books and other items on the shelf. It is equally important to be well versed in the numbering system in order to successfully locate your call number among all of the others on the shelf.

The first line of a call number may begin with one, two or three letters. These letters should be read alphabetically. A call number that begins with A is shelved before one that begins with B, C, etc.; and a call number that begins with QE is shelved somewhere between the one that starts with Q and the one that starts with QL.

Single letters are filed before double letters.

<b>D</b>	<b>DC</b>	<b>DL</b>	<b>F</b>	<b>FA</b>
----------	-----------	-----------	----------	-----------

The second line of a call number is made of a number that may have one or more digits. This line is read numerically. A call number with a smaller number in its second line is shelved before one that has a larger number for its second line.

<b>QA</b>	<b>QA</b>	<b>QA</b>	<b>QA</b>	<b>QA</b>
<b>50</b>	<b>55</b>	<b>76</b>	<b>76.15</b>	<b>76.73</b>

The third line is the trickiest part of the call number. **The letter is shelved alphabetically, and the number following the letter is treated as if it were preceded by a decimal.**

<b>PN</b>	<b>PN</b>	<b>PN</b>	<b>PN</b>	<b>PN</b>
<b>6231</b>	<b>6231</b>	<b>6231</b>	<b>6231</b>	<b>6231</b>
<b>.E259</b>	<b>.E29</b>	<b>.E4</b>	<b>.E74</b>	<b>.F44</b>

When the top three lines are identical, look to the fourth line. If it contains a letter followed by numbers, items are organized alphabetically by letter, and within each letter by **decimal** number. (Note the number is treated as a decimal number even though there is no visible decimal point).

<b>QE</b>	<b>QE</b>	<b>QE</b>	<b>QE</b>	<b>QE</b>	<b>QE</b>
<b>862</b>	<b>862</b>	<b>862</b>	<b>862</b>	<b>862</b>	<b>862</b>
<b>.D5</b>	<b>.D5</b>	<b>.D5</b>	<b>.D5</b>	<b>.D5</b>	<b>.D5</b>
<b>L22</b>	<b>L35</b>	<b>L4571</b>	<b>L461</b>	<b>M3311</b>	<b>M37</b>

The final lines of the call numbers may include dates, volume indicators, issue numbers, copy numbers and other annotations such as supplement or index specifiers. These annotations are read after the call number.

<b>Q</b>	<b>Q</b>	<b>Q</b>	<b>Q</b>	<b>Q</b>	<b>QD</b>	<b>QD</b>	<b>QD</b>	<b>QD</b>
<b>10</b>	<b>10</b>	<b>10</b>	<b>10</b>	<b>10</b>	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>
<b>C 3</b>	<b>C3</b>	<b>C3</b>	<b>C3</b>	<b>C3</b>	<b>A5</b>	<b>A5</b>	<b>A5</b>	<b>A5</b>
	<b>1933</b>	<b>1990</b>	<b>1996</b>	<b>1996</b>	<b>Vol. 1</b>	<b>Vol. 2</b>	<b>Vol. 2</b>	<b>Vol. 2</b>
			<b>copy 1</b>	<b>copy 2</b>			<b>Plates</b>	<b>Supp.</b>

### Subject Headings

The Library of Congress assigns subject headings to every book that is given a call number. These subject headings represent what the book is about. Some books

have one subject heading, some have several. In Mandarin OPAC, subject headings for each book are listed near the bottom of the item record.

The screenshot shows the 'M3 OPAC' interface for the Catholic University of Zimbabwe Library. The main content area displays 'Search Results Record Details' for a book. A table at the top lists the book's location, call number, barcode, status, and due date. Below this, the book's details are shown, including the title, publisher, description, and subject heading. A red arrow points to the subject heading 'Physical geography'. The interface also includes navigation buttons like 'First', 'Previous', 'Next', and 'Last', and a 'Back To Record List' button.

Location	Call Number	Barcode	Status	Due Date
Open Shelf	GB 54,5.158 HOL	BK0000246	On Loan	2/10/14

**Call #:** GB 54,5.158 HOL  
**Title:** An introduction to physical geography and the environment / edited by Joseph Holden.  
**Publisher:** Harlow, England ; - New York : - Pearson Prentice Hall, - 2008.  
**Description:** xxxi, 762 p. : ill. (chiefly col.), col. maps ; 28 cm.  
**Subject:** Physical geography.  
**Add. Author:** Holden, Joseph, 1975-  
**Note:** Includes bibliographical references (p. 733-751) and index.  
**Web Site:** <http://www.loc.gov/catdir/toc/>

Subject headings dictate the beginning of the call number, and play a major role in the location of items on the shelf. For instance, if a book's call number begins with the letter **E**, the main topic of the book will be American History. Because the Catholic University of Zimbabwe Library uses the Library of Congress system, books are grouped together on the shelves according to their subject, thus most of the books on American History will be found in the same area of the Library. When looking for books on particular subjects, it is often helpful to browse the shelf area where those subjects can be found.

For more Library of Congress subject classifications, consult the table below:

<b>A - General Works</b>	<b>N - Fine Arts</b>	<b>QE - Geology</b>
<b>B - Philosophy-Religion- Psychology</b>	<b>P - Linguistics</b>	<b>QH - Biology</b>
<b>C - History (Civilization)</b>	<b>PC - Romance Languages</b>	<b>QK - Botany</b>
<b>D - History (Except America)</b>	<b>PD - Germanic Languages</b>	<b>QL - Zoology</b>
<b>E - American History</b>	<b>PE - English Language</b>	<b>QM - Human Anatomy</b>
<b>F - Local American, Latin American History</b>	<b>PQ - Romance Literature</b>	<b>QP - Physiology</b>
<b>G - Geography- Anthropology</b>	<b>PR - English Literature</b>	<b>QR - Microbiology</b>
<b>H - Social Sciences</b>	<b>PS - American Literature</b>	<b>R - Medicine</b>
<b>J - Political Science</b>	<b>Q - Science</b>	<b>S - Agriculture</b>
<b>K - Law</b>	<b>QA - Mathematics</b>	<b>T - Technology</b>
<b>L - Education</b>	<b>QB - Astronomy</b>	<b>U - Military Science</b>
<b>M - Music Scores</b>	<b>QC - Physics</b>	<b>V - Naval Science</b>
<b>ML - Music (Literature of Music)</b>	<b>QD - Chemistry</b>	<b>Z - Bibliography, Library Science</b>
